

Mujtaba Shah.

Senior Automation Analyst , DigiBlu

PROFILE

Consulting professional with 10+ years' experience in project management and business analysis. Expert in delivering automation, process optimisation, and digital transformation projects. Skilled in business case development, solution design and implementation, and stakeholder management. Certified Scrum Master and Product Owner with strong communication skills, bridging business needs and technology solutions.

EXPERIENCE

Senior Automation Analyst

Dec 2021 – present

DigiBlu

- Led automation initiatives for clients including a UK healthcare group, delivering RPA and workflow solutions that streamlined business processes, reduced manual work, and improved turnaround times.
- Partnered with a pensions administrator firm to conduct as-is business process assessments, define future-state operating models, and create detailed SOPs and technical documentation to enable automation-driven service delivery.
- Delivered opportunity assessments and ROI-focused business cases, securing senior stakeholder approval for automation roadmaps and investment.
- Designed and implemented intelligent automation solutions integrating automation technologies, document digitisation, and process orchestration, delivering measurable benefits in efficiency, compliance, and cost reduction.
- Collaborated with business and IT stakeholders through workshops, requirements gathering, and solution design sessions, ensuring alignment between automation delivery and strategic objectives.

Management Consultant

Apr 2018 – Nov 2021

Infosys Consulting

- Managed digital transformation programs for clients, including RPA implementation and a Digital Experience Platform discovery for a major educational institution, improving operational efficiency and user engagement.
- Conducted technical feasibility assessments and designed future-state processes, developing comprehensive business cases that secured senior stakeholder buy-in and funding.
- Defined end-to-end solution requirements (functional, non-functional, and security) and produced detailed specifications to guide development and implementation teams.

SKILLS

- Project Management
- Requirements Gathering
- Process Mapping (As-Is/To-Be)
- Technical Writing (SOPs)
- Agile Methodologies (Scrum, Kanban)
- Business Analysis
- Stakeholder Management
- Power BI
